

Science Club

We run a science club for KS1 in the Spring Term and for KS2 in the Summer Term. At Hampton Hargate we participate in the CREST awards. For the younger children we follow the Crest Star Award and for the older children the Crest Super Star Awards where the children have to complete some real-life science, technology, engineering and maths challenges through practical investigations and discussions.

Some of the activities for the KS1 club were as follows:

Brilliant Bubbles

Confusing Cans

Scrapyard Scraps

Sniffly sneezes

Peggy Problem

The children thoroughly enjoy the activities on offer and leave the club buzzing with excitement having applied their science skills whilst having fun.
