

We investigate how music has been written by a variety of composers

Music at Hampton Hargate

We are able to express ourselves through our performing and composing, empathising with the situation / emotion the music is for.

We aim to use a variety of musical language, and understand that it is often not from the English

We gain independence rehearsing on our own

We use our bodies physically to create music through singing and playing instruments.

We gain team skills rehearsing with our peers

We understand the purpose of music, how it helps to commemorate events, and the history behind these events

We like to investigate our own interests in music when we are at home.

We love practical sessions with instruments 😊 and enjoy developing musical ideas for a scenario / event. We are always engaged and focused on our tasks.

We listen to how different pieces of music make us feel, and the impact they have had / do have on the community / world

In music at Hampton Hargate we aim to develop confident and creative children who can appreciate what hard work and dedication can do for them. We aim to open their eyes to the wider world through a love and understanding of the variety of arts around us, but especially the performing arts, that helps us to understand ourselves and empathise with others in a mature way.

All our practical skills are transferable, and help us in other areas of our school life!

We enjoy performing to our peers, both independently as a soloist, and in groups, from 2 people to 102 people! This develops our confidence!
